POLLUTION CONTROL. Environmental permit system in Quebec precipitates consideration of advanced environmental technologies, Part II: technology requirements to meet proposed effluent limits. P.R. Stuart et al. (T415) 12:143.

ANNUAL INDEX

POLYMERS. Apertured structures: a new class of porous polymeric press fabrics. J. Hawes. (T375) 12:103.
POTENTIAL of fungal culture filtrate treatment to reduce extractive levels in newsprint mill white-water systems. D. Stebbing. (T72) 3:46.
PRESS ROLLS. A survey of granite roll substitutes. C. Thompson et al. (T257) 8:37.
PRESS SECTIONS. Dynamic instability of poly covered press rolls. F. Chinn. (T11) 1:46.
PRESSURIZED EQUIPMENT. Experiences of duplex stainless steel in the pulp and paper industry. J. Olsson et al. (T123) 4:51.
PRESSURIZED H_2O_2 bleaching provides a raft of benefits for Western Pulp. G. Rodden. 9:12.
PRIMARY and secondary sludge composting: a feasibility study. T. Arroug(et al. (T105) 4:33.
PROBLEMS in composite floor tubes in recovery boilers. A. Klarin et al. (T237) 7:64.
PROCESS AUTOMATION. The unique year 2000 challenges of process automation. R.F. Sikora et al. (T419) 12:148.
PROCESS CONTROL. Evolution of PC-based process controls. 10:20.
PROCESS CONTROL. Using environmental parameters to optimize process operation. J.-F. Levasseur et al. (T410) 12:139.
PRODUCT from residue: standard setting for alkaline mill residues in Quebec. R. Lessard et al. (T135) 5:27.
PROJECT life cycle benefits realized through dynamic process simulation. G. Jones et al. (T64) 2:46.
PROPERTIES of CTMP from mixtures of aspen, birch and maple. K.-N. Law et al. (T389) 12:117.
PULP and paper research and education at Polytechnique: a growing partnership. J. Paris et al. (T143) 5:35.
PULP STONES. V21 bonded pulpstone trials at Abitibi-Consolidated, Fort Frances. A.J. Johnson. (T301) 9:56.
PULSE chelation with DTPA. Y. Ni et al. (T382) 12:110.

Q

QUALITY CONTROL. Xerox looks for long-term suppliers through its qualification process. PPC Special Report. 8:15.

R

REBUILDS: Organizations and philosophies are under construction. J. Bailey. 5:8.
RECOVERY BOILERS. Chloride removal from the kraft recovery boiler ESP dust using the precipitator dust purification (PDP) system. N. Jemaa et al. (T219) 7:46.
RECOVERY BOILERS. Non-process elements in the kraft cycle, Part I: Sources, levels and process effects. N. Jemaa et al. (T292) 9:47.
RECOVERY FURNACES. Advanced control strategy reduces recovery boiler fouling while liquor throughput is increased. B. Hirtz et al. (T288) 9:42.
RECOVERY FURNACES. Dynamic study of carryover deposition in kraft recovery boilers using an entrained flow reactor. R. Shenassa et al. (T332) 10:56.
RECOVERY FURNACES. Problems in composite floor tubes in recovery boilers. A. Klarin et al. (T237) 7:64.
RECOVERY FURNACES. Stress-corrosion cracking of type 304L stainless steel in kraft recovery boiler environments. B. Prescott et al. (T202) 6:72.
RECOVERY FURNACES. The effect of temperature excursion on sulphidation of carbon steel in 1% H_2S environment. S.J. Al-Hassen et al. (T318) 10:40.
RECOVERY. The Generator Acid Purification (GAP) system reduces caustic make-up requirements at kraft mills. M.Paleologou et al. (T52) 2:34.
RECYCLING. Domtar Paper's, land application: experience at Cornwall. G. Velema. (T68) 3:42.
REDUCED biomass production using acid effluent from a kraft bleach plant. A. Elliott et al. (T138) 5:30.
REDUCTION of fresh water consumption for process and non-process uses in an integrated newsprint mill. J.F. Houle et al. (T76) 3:50.
REDUCTION of paper machine water consumption. J. Boyko et al. (T215) 7:42.
REINFORCED PLASTICS. Fibreglass reinforced plastic equipment of failure analyses. T.W. Cowley. (T44) 2:26.
REPULPING. Zeolite microparticles in flotation deinking and their effect on system closure. G. Grondin et al. (T265) 8:46.
RISK MANAGEMENT planning: opting out through chemical substitution or minimizing off-site impacts through mitigation systems. D.M. Bryer et al. (T94) 3:69.

S

SAFETY CONFERENCE. Taking a more sophisticated approach to workplace safety. P. Greenbaum. 11:15.
SAFETY. Which is the safest mill in Canada? P. Green et al. 11:17.
SCREEN room modernization. T. Spinelli et al. (T163) 6:30.
SHRINKING laptops. N. McCubbin. 11:53.
SIMPLE solutions are often the best. G. Rodden. 3:28.
SIMULATION. Project life cycle benefits realized through dynamic process simulation. G. Jones et al. (T64) 2:46.
SLUDGE CONTROL. Sludge dewatering process optimization/cost reduction at an integrated pulp and paper mill. J.N. Harvey et al. (T97) 4:21.
SLUDGE dewatering practices at Canadian pulp and paper mills. J.G. Dorica et al. 5:19.
SLUDGE dewatering process optimization/cost reduction at an integrated pulp and paper mill. J.N. Harvey et al. (T97) 4:21.
SLUDGE DISPOSAL. Primary and secondary sludge composting: a feasibility study. T. Arroug(et al. (T105) 4:33.
SOIL CONDITIONERS. Land application of mechanical pulp sludges in Alberta: research and operational activities. T.M. Macyk. (T167) 6:35.
SPENDING still high in Quebec mills. J. Bailey. 6:15.
STAINLESS STEELS. Factors controlling pitting of stainless steels under wet deposits in splash zones in chlorine dioxide bleaching. T. Hakkarainen. (T127) 4:55.
STANDARDS. Product from residue: standard setting for alkaline mill residues in Quebec. R. Lessard et al. (T135) 5:27.
STATISTICAL ANALYSIS. Analyse statistique des casses de la feuille dans une machine à papier. A. Oulidi. (T152) 5:44.
STRESS corrosion cracking of 316L oxygen reactor pressure vessels. D.C. Bennett. (T170) 6:39.
STRESS-corrosion cracking of type 304L stainless steel in kraft recovery boiler environments. B. Prescott et al. (T202) 6:72.
SULPHUR distribution during air gasification of kraft black liquor solids in a fluidized bed of TiO2 particles. L. Zeng et al. (T188) 6:58.
SUPERCALENDERING. On-line supercalendering. C. Palm et al. (T198) 6:68.
SUPPLIERS. Experience for hire. 4:17.
SURVEY of granite roll substitutes. C. Thompson et al. (T257) 8:37.
SURVEYS. Mass transfer in oxygen delignification systems: mill survey results, analysis and interpretation. C.P.J. Bennington et al. (T394) 12:123.
SYSTEM closure and corrosion in high-yield pulping processes. P.H. Clarke. (T360) 11:43.
SYSTEM closure in integrated newsprint mills: review of R&D issues. J. Paris et al. (T274) 9:24.

T

TAKING a more sophisticated approach to workplace safety. P. Greenbaum. 11:15.
TAKING the hazard out of gas exposure. L. Svirchev et al. 3:19.
TAKING the risk out of extreme environment maintenance. G. Rodden. 7:28.
TECHNICAL Equipment. To build or not to build. J. Bailey. 8:10.
TEMPERATURE. Autocausticizing of smelt with sodium borates. H. Tran et al. (T283) 9:35.
THE WORD on Word. N. McCubbin. 10:63.
TO BUILD or not to build. J. Bailey. 8:10.
TOWARDS industrial applications of bast fibre pulps. E. de Jong et al. (T270) 9:19.
TOWARDS kraft mill closure: Inorganic element for Tasman Pulp and Paper Company Ltd. M. Ellis et al. (T206) 7:33.
TSE Paper and Forest Index outperforms in '99. P. Mohr. 8:8.
TUBES. Corrosion of composite tube air-ports in kraft recovery boilers: Cr_2O_3, Fe_2O_3, NiO solubility in molten hydroxide. M. Estes et al. (T378) 12:106.
TUBES. Mechanical design of steel tubing for use in black liquor recovery boilers. B. Taljat et al. (T313) 10:34.

U

UNIQUE year 2000 challenges of process automation. R.F. Sikora et al. (T420) 12:152.
UNIVERSITIES. Pulp and paper research and education at Polytechnique: a growing partnership. J. Paris et al. (T143) 5:35.
USE of antioxidants to delay the ageing of oil-based inks. C. Castro et al. (T227) 7:54.
USING environmental parameters to optimize process operation. J.-F. Levasseur et al. (T411) 12:139.
USING reliability to optimize your process. L. Estévez-Reyes. (T233) 7:60.

V

V21 bonded pulpstone trials at Abitibi-Consolidated, Fort Frances. A.J. Johnson. (T301) 9:56.
VALVES. Control valve selection: How big an issue? D. Nelson et al. 12:30.
VALVES. Optimizing control loop performance. E. Macys. 12:36.

W

WASTEWATER. Evaluation of sulphur source emission around the wastewater treatment of a kraft mill. R. Dufresne et al. (T1) 1:33.
WATER reuse in the pulp and paper industry: evaluation of four microfiltration applications. C.M. Silva et al. (T146) 5:38.
WATER TREATMENT. The potential of fungal culture filtrate treatment to reduce extractive levels in newsprint mill white-water systems. D. Stebbing. (T72) 3:46.
WELL-informed environmental staff can help save a company millions. P. Riebel. 5:57.
WHAT'S going on? J. Bailey. 1:73.
WHEN Donohue's Michel Desbiens speaks.... G. Rodden. 12:38.
WHICH is the safest mill in Canada? P. Green et al. 11:17.
WHITE top shines at St. Laurent. M. Koepenick. 1:8.
WINDER optimization - Roll runnability benchmarking without the pressroom. B.B. Laplante. (T343) 11:24.
WINDERS. Operating results of a TNT reel. G.J. Kramer et al. (T48) 2:30.
WOODHANDLING. Effluent-free drum debarking. R. Saunamäki et al (T101) 4:27.
WORKING in the hot zone. J. Bailey. 1:23.

X

XEROX looks for long-term suppliers through its qualification process. PPC Special Report. 8:15.

Y

YEAR 2000: COMPETITION. New ideas needed for the millennium. J. Bailey. 10:13.
YEAR 2000 EDUCATION: Placing a greater emphasis on knowledge. P.J. Greenbaum. 5:12.
YEAR 2000: MANAGEMENT. P.Greenbaum. 2:11.
YEAR 2000: TECHNICAL EQUIPMENT. J. Bailey. 8:10.
YOU still do not use a computer? N. McCubbin. 3:75.

Z

ZEOLITE microparticles in flotation deinking and their effect on system closure. G. Grondin et al. (T265) 8:46.
